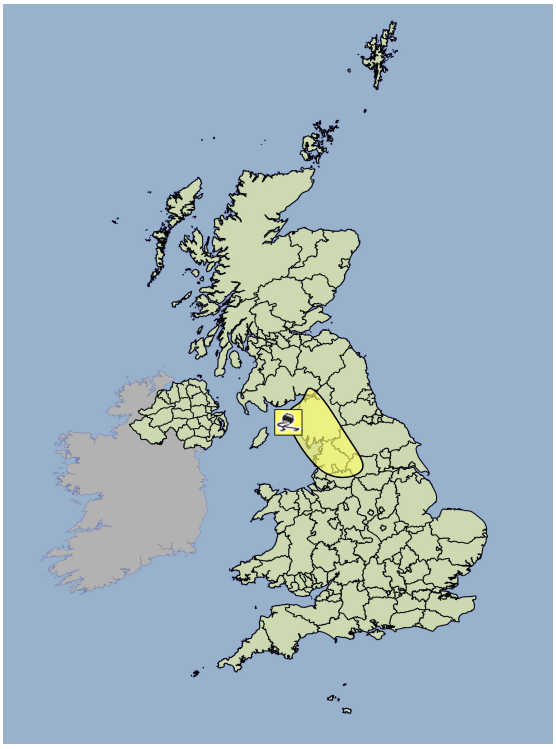
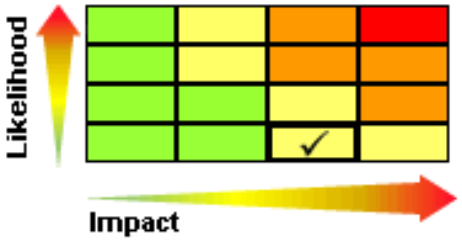
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of rain, sleet and snow moving through the area overnight will lead to a local covering of snow, mainly no high ground. However, with temperatures falling quickly below zero on the roads, ice will be the main hazard.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **03:00 on Sat, 21st Nov 2015** until **10:00 on Sat, 21st Nov 2015**

Following a spell of rain, sleet and snow, falling temperatures will allow icy stretches to form on untreated roads and pavements.

You are advised to take extra care, and to be aware of difficult driving conditions and the risk of some travel disruption.
